Pull request review record

The complete diffs for PRs #5 and #6 were inspected on 23 October 2026. GitHub showed no submitted reviews or reported check results. PR #5 contains mock/placeholder data, placeholder repository values, and stale-result behavior; main contains separately integrated corrections. PR #6 was merged by its author, but its sample data and pickle-based model were replaced during integration. These findings are integration records, not GitHub review approvals.

Evidence note

The project uses GitHub usernames and assigned areas. The contribution record distinguishes integrated project work from member-authored work. It does not invent personal details, member statements, measured outcomes, or external feedback. Member sign-off and physical-device evidence are not available.
