# G11 contribution evidence

Repository-verified contribution and pull-request review record | 23 October 2026

| GitHub username | Assigned area | Verified contribution evidence | Status |
|---|---|---|---|
| cxnisme | Group leadership, integration, release coordination | Led project integration and release preparation. APK and release verification remain in progress. | Group leader/integrator |
| alain143 | Mobile UI/navigation | Mobile screens/navigation incorporated in 4cdc9d9. PR #5 remains open with review findings recorded. | Implementation integrated; PR open |
| IHIMBAZWEAngelique | AI matching/data | No member-authored implementation PR or evaluation evidence recorded. The matcher is present in release integration. | Task evidence pending |
| rudasingwatheogene1 | FastAPI backend | PR #6 merged by author. Original sample-data/pickle implementation was replaced during release integration. | PR merged; integration superseded original implementation |
| ladumartinbullen-cmyk | Offline/quality | No member-authored implementation PR or physical-device evidence recorded. Offline behavior is present in release integration. | Task evidence pending |

Our member directory uses GitHub usernames and assigned areas. Personal details, member claims, measured outcomes, and user feedback are included when supported by member confirmation or recorded evidence. The contribution record distinguishes integrated work from member-authored changes.

# Pull request review record

Review of complete PR diffs | GitHub showed no submitted reviews or check results for either PR

| Pull request | Review findings and integration status |
| --- | --- |
| #5 - Alain (open) | **Changes identified for the submitted branch.** It defaults to mock mode with placeholder profiles, contains GXX/placeholder repository configuration, and uses a module-global previous result that may appear after a different query fails. Release integration replaced the mock data, corrected project identity, and scopes the result cache by query. PR #5 remains open and unmerged. |
| #6 - Theogene (merged) | **Post-merge review findings.** The submitted diff included unverified sample profile claims, automatic sample-data generation, pickle model loading at API startup, missing requir /members endpoints, and a CORS test without matching middleware in that diff. Sample data and the pickle path were removed; the API was replaced during release integration. The GitHub merge remains part of repository history. |

Review notes are recorded here as project documentation. The final integration has separate local validation results; those results describe the integrated code and are separate from the PR-head checks.
